

FlexPod Express

for Business Environments

FlexPod Express for the office environment takes the tested and verified FlexPod Express solution bundle and makes it fully ready to deploy in the Branch and SME space, without any of the delay or cost that comes with finding dedicated IT space.

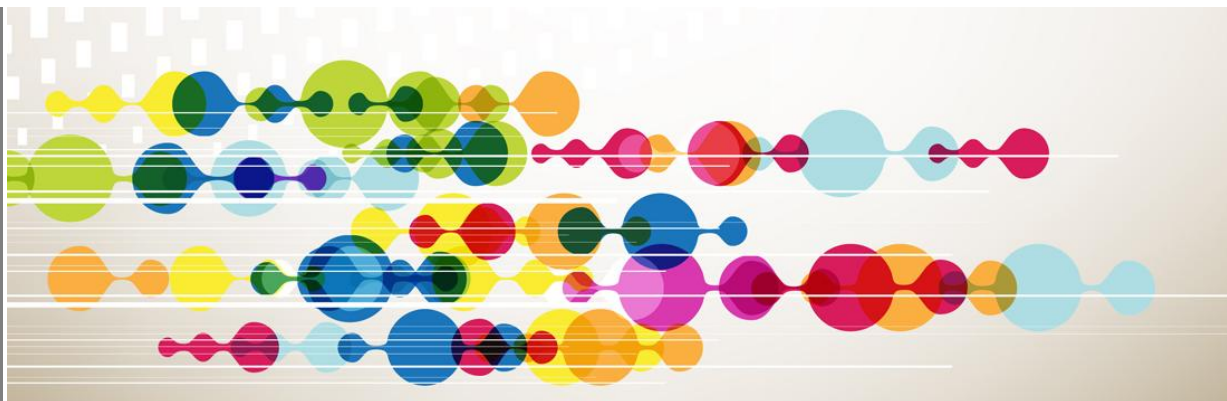

This is achieved by wrapping the FlexPod Express stack in an infrastructure life support system designed to house and manage the FlexPod Express environment, deploying straight out of the box, straight in to the office.

The Cisco & NetApp FlexPod Express is dressed in a tailor-made suit of Schneider Electric physical infrastructure and StruxureWare management tools.

Once built, the result is a fully mobile, highly manageable solution for rapid deployment in to Small to Medium Enterprise offices and in to Remote & Branch Offices for large organisations.

FlexPod Express for Business Environments

Solutions tailored for SME, Remote Workplaces and Branch Offices

- **NetShelter CX** 'Server Room in a Box' soundproofed self-cooled enclosure for deploying IT in office environments.
- **Smart-UPS** and redundant Smart-UPS for complete power reliability, with Network Management capabilities and energy data collection & sharing.
- **Metered PDUs** with switchable outlets to remotely control all equipment in the stack.
- **NetBotz** Temperature & Humidity data coupled with door contact and camera surveillance.
- **StruxureWare** Data Centre Expert infrastructure management layer for aggregating data and integrating with Building Management Systems.
- **Available space** in the solution for growth and additional equipment such as WAN Optimizer, KMM Device etc.

FlexPod Infrastructure Life Support Components

Infrastructure Intelligence

StruxureWare Data Centre Expert

Environmental Monitoring & Security

Temp & Humidity Sensors, Camera Pod
Door Contact Sensors & Access Control

Power Protection & Distribution

Switched by outlet, metered, network PDUs
Automatic Transfer Switch
Smart-UPS 3KVA UPS

Racking and Cooling

NetShelter CX Soundproof Self-ventilated Office Enclosure with Dust Filters, Cable Management, Blanking & Brush Strips

Together, Schneider Electric, Cisco and NetApp enable the Cloud, both in the Data Centre and at the edge of the network, in Business Environments.
